

CONSULTANT APPROVALS

PROJECT TEAM

The EIA project team was pre-approved by the Bahamas Environmental Science Technology commission, prior to the beginning the EIA task. A copy of the BEST letter of approval is attached. All team members were subsequently issued temporary work permit for use during the project. The following is a summary of team member's responsibilities during the project.

Mr. Duvall PG, LAC, REP is a registered professional geologist, and senior environmental consultant. Mr. Duvall oversees all aspects of KES Inc's environmental projects, including peer review, quality assurance, budgets, and schedules. Mr. Duvall has over 20 years of environmental consulting experience, and was project manager for the Abaco EIA project.

Mr. Hanskat is a professional engineer, who received his Bachelor Degree in Mechanical Engineering from the University of Florida. Mr. Hanskat has more 18 years professional consulting experience, which include property condition surveys, environmental risk assessments, and work involving hazardous waste, petroleum and hydrocarbon soil and groundwater investigations, and structural, mechanical and electrical inspector /investigator, as engineer of record. Mr. Hanskat is also very familiar with all of the Bahama Islands and conducted the aerial and initial site recognizance of the project.

Mr. Adair, a Certified Ecologist, has a Bs in Biology and graduate study in Marine Biology; he has over 18 years of professional environmental experience in the areas of state and federal wetland jurisdiction determination, wetland mitigation design and implementation, wetland monitoring, wildlife surveys, and environmental planning and permitting, and was the project ecologist.

Ms. Robbins has a BS in Engineering and is an environmental engineer with more than 10 years of experience. Ms Robbins specializes in risk assessment and remedial system design and operation, using such methods as air sparge/soil vapor extraction,

bioremediation (microbial slurry); bio-sparg technology, and multiphase extraction. Ms. Robbins is currently managing site remediation of a bulk fuel terminal facility in Florida. Ms. Robbins provided data acquisition, research, logistics support and peer review of project elements.

Ms. Thorpe is a Certified Industrial Hygienist, who received a B.A. in Biology from Wellesley College in Wellesley, Massachusetts, and a M.S. in Industrial Hygiene from the University of Pittsburgh, Graduate School of Public Health, where she specialized in Industrial Hygiene. Ms. Thorpe directs the Occupational Safety and Health Practice for the firm and supports its environmental consultant practice. Ms Thorpe provided input with respect to occupational safety and health concerns.

James D. Smith has over 23 years of experience in safety, risk management, industrial hygiene and environmental fields. He has a Bachelor and Master of Science degrees in Industrial Safety from Central Missouri State University. He is a Certified Safety Professional (CSP) by examination with specialty in management and comprehensive practices. Mr. Smith input with respect to SPCC and BMP plans.

Mr. Horner is an engineer with over nine years of experience in handling large, multifaceted projects and interacting with multiple agencies He has a B.S., Ocean Engineering, from Florida Atlantic University and has design experience with offshore and coastal construction projects including breakwaters, bulkheads, seawalls, docks and mooring structures.

Mr. Westmark is a professional engineer, who received his Bachelor Degree in Chemical Engineering and Chemistry, both from the University of Florida. Mr. Westmark's areas of specialization include: Industrial and Commercial Facility Support, including Air Permitting, and Annual Air Operation Reporting. Mr. Westmark provided input with regards to ambient air quality and air emission standards.

TECHNOLOGY COMMISSION**
Ministry of Energy and the Environment

MEE/BEST/EIA/S/30

23 February 2007

Mr. Brent Williamson
Manager, Safety and Environment
Bahamas Electricity Corporation
Nassau, The Bahamas

Re: Snake Cay Power Plant, Abaco – Pre-approval of Consultants

Dear Mr. Williamson:

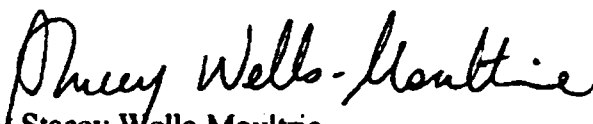

I am directed to inform you that technical review of the individuals proposed to produce the EIA for the abovementioned project has been done and pre-approval is given for the following consultants of KES to collect data for development of the EIA for the Snake Cay, Abaco power plant project:

Michael Duvall
Marianna Thorpe
Barry Westmark
Richard Potter
Eric A. Shaw
Jim Smith
Brian Horner

All foreign nationals must provide proof of permit for work as well as for research from relevant government agencies on submission of the EIA or the EIA will not be accepted for review. It is understood that Bahamians and residents with the right to work are not required to submit proof of work permits on submission of the EIA.

As per our conversation, BEC still needs to confirm biologist or ecologist with experience in The Bahamas to be a part of the EIA development team. Once this person is identified, please forward their cv to BEST for review and pre-approval. You may contact the Commission if you need any additional clarification or information.

Yours sincerely,

Stacey Wells-Moultrie
(for) Permanent Secretary

cc. Ms. Camille Johnson, Permanent Secretary
Mr. Vernon Burrows, Director, Department of Immigration

Re: Snake Cay Power Plant, Abaco – Pre-approval of Consultant (Ecologist)

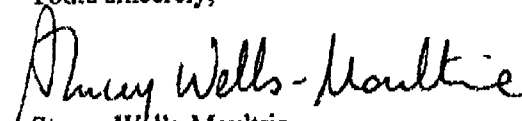

Dear Mr. Williamson:

I am directed to inform you that technical review of the individual proposed to assist in producing the EIA for the abovementioned project has been done and pre-approval is given for Mr. Jeffery Adair of KES to collect data for development of the EIA for the Snake Cay, Abaco power plant project.

All foreign nationals must provide proof of permit for work as well as for research from relevant government agencies on submission of the EIA or the EIA will not be accepted for review. It is understood that Bahamians and residents with the right to work are not required to submit proof of work permits on submission of the EIA.

You may contact the Commission if you need any additional clarification or information.

Yours sincerely,

Stacey Wells-Moultrie
